

If there was a vaccine against cancer, wouldn't you get it for your *keiki*?

The HPV vaccine prevents some cancers. Talk to the doctor about vaccinating your 11-12 year old daughters and sons against HPV.

"We vaccinated our kids from birth to protect them from polio, measles, whooping cough and other illnesses. Why not also protect them from cancers they might get from this virus in the future? It was an easy decision."

—May with Kevin and *keiki* (Taylor, Kalen, Ashley)
Wahiawā, O'ahu
